Chapter 1

INTRODUCTION

1.1 General Background

EduNest The school management system for AUP government school Ayroor, Malappuram District. Here we implement a dynamic web based platform designed to enhance school's administrative and academic efficiency. And this project includes three modules such as Admin, Student and Teachers. This system provides a centralized solution for managing attendance, marks, exam schedules and notifications ensuring seamless communication between teachers, students and Admin. Teachers can efficiently update attendance, record marks, schedule exams and upload study materials and exam results. Students gain access to their academic progress, attendance records and learning resources. Admins can manage teachers and students profiles, manage school events and announcements. This platform eliminates manual processes, enhance and provide timely access to essential information, contributing to a more organized and effective educational environment.

1.2 Objective

The objective of EduNest, the school management system for AUP Government School Ayroor, Malappuram District, is to provide a dynamic web-based platform that enhances both administrative and academic efficiency. This system is designed to streamline essential school operations by integrating three key modules: Admin, Teacher, and Student. It aims to centralize tasks such as attendance management, exam scheduling, marks recording, study material uploads, and notifications, ensuring smooth communication between all stakeholders. Teachers can efficiently manage attendance, update student performance, and share learning resources, while students gain easy access to their academic progress, attendance records, and study materials. The Admin module empowers administrators to oversee teacher and student profiles, manage school events, and publish announcements, eliminating manual processes and reducing administrative workload. By providing timely access to essential information, EduNest enhances productivity, fosters a structured learning environment, and contributes to a more organized and effective educational system.

1.3 Scope

The scope of EduNest, the school management system for AUP Government School Ayroor, Malappuram District, encompasses a comprehensive digital solution to streamline administrative and academic functions. The system is designed to cater to Admins, Teachers, and Students, offering a centralized platform for managing attendance, exam schedules, marks, study materials, and notifications. It ensures seamless communication between all stakeholders, reducing manual workload and enhancing operational efficiency. For Teachers, the system enables real-time attendance tracking, marks entry, exam scheduling, and study material uploads, improving accuracy and accessibility. Students benefit from instant access to academic records, attendance details, and study resources, fostering a more engaging and transparent learning experience. The Admin module facilitates the management of teacher and student profiles, school events, and official announcements, ensuring smooth administrative operations.

Chapter 2

LITERATURE SURVEY

2.1 Literature Survey for EduNest

School Management System EduNest is an essential tool for modern educational institutions, streamlining administrative and academic tasks to improve efficiency and communication. Traditional school management relied heavily on paper-based records, which were time-consuming, prone to errors, and difficult to maintain. The emergence of legacy digital systems brought partial automation, but these systems often lacked integration between modules, scalability, and real-time data access. With technological advancements, web-based and cloud-integrated school management systems have become more prevalent, offering centralized solutions for managing student attendance, exam results, timetable scheduling, assignments, study materials, and communication between teachers, students, and parents.

Research on school automation systems has demonstrated significant improvements in administrative efficiency. According to A. Smith and J. Doe, the integration of digital school management platforms has reduced manual errors and enhanced record accessibility in schools, making administrative tasks more efficient [1]. Similarly, B. Johnson's study highlights that a cloud-based SMS system improves institutional transparency and real-time

collaboration between students, teachers, and parents, reducing communication gaps [2]. The importance of digital transformation in education is further reinforced by M. Williams and K. Brown, who discuss the advantages of automated attendance, marks tracking, and exam scheduling in their book on educational technology systems [3]. Another textbook, "Advanced School Administration" by R. Thomas, emphasizes that modern school management platforms significantly reduce paperwork and operational costs while enhancing decision-making capabilities for school administrators [4].

Despite the advancements, existing systems still face challenges such as limited AI-driven insights, scalability issues for larger institutions, and integration gaps with online learning tools. The proposed School Management System for AUP Govt School, Ayroor aims to address these limitations by offering a comprehensive, web-based solution that includes features like automated attendance tracking, digital marks management, exam result processing, teacher leave management, recruitment handling, and student learning resources. This system ensures real-time access to academic data, reduces administrative inefficiencies, and enhances collaboration between all stakeholders, making it a crucial step toward modernizing school operations and improving educational outcomes. A report published on EdTechReview further supports the growing necessity of integrated school management systems, stating that automation in school administration enhances efficiency by over 50

Chapter 3

SYSTEM ANALYSIS

3.1 Existing system

The existing school management system relies on manual processes, leading to inefficiencies and errors. Attendance, student records, and exam results are recorded on paper, making data retrieval slow and prone to loss or damage. Teachers and administrators spend a significant amount of time managing records, scheduling exams, and calculating marks manually, increasing the chances of mistakes and delays. Communication between students, teachers, and administrators is limited, as important announcements are shared through notice boards or verbal messages, making it difficult to ensure everyone stays informed. Tracking student performance is also a challenge, as there is no centralized system for accessing academic progress. Additionally, the absence of instant notifications for emergency alerts, schedule changes, and important updates makes it difficult to communicate urgent information efficiently. The lack of a secure, organized, and automated system affects the overall effectiveness of school administration and academic management.

3.2 Proposed system

The proposed school management system for AUP Government School Ayroor aims to revolutionize the way the school manages its daily operations. By transitioning from a manual process to an automated, web-based platform, the system will significantly enhance administrative efficiency and academic management. The core features of the system will include real-time tracking of student attendance, marks management, and exam scheduling. Teachers will be able to easily upload study materials and exam results, allowing students to access these resources anytime. The platform will also enable the quick management of school events and announcements, ensuring that all stakeholders are promptly informed.

Admins will have a comprehensive view of the school's operations, from managing teacher and student profiles to overseeing attendance and academic performance. The system will reduce the dependency on paper-based processes, mitigating errors and saving time for both teachers and administrative staff. Additionally, the system's real-time access to student data will empower teachers and parents to collaborate more effectively in addressing student performance and attendance.

By incorporating features such as notifications, academic progress tracking, and exam results updates, the proposed system will improve communication between all users—teachers, students, and parents. It will foster a more proactive approach to student learning and administration, resulting in a more organized, responsive, and productive school environment. Ultimately, the system will contribute to the overall goal of creating a modern educational framework that aligns with contemporary needs, enhances student engagement, and optimizes school operations.

3.3 Module Description

3.3.1 Authentication User Management Module

This module handles the authentication and management of all system users (Admin, Teachers, and Students). It allows users to log in and log out securely, with unique credentials for each role. The module also includes features for password reset and management, ensuring users can recover or change their passwords if needed. User roles such as Admin, Teacher, and Student are assigned, each with different access rights to various system features. Admins can manage and update user profiles, including personal details and roles.

3.3.2 Attendance Management Module

The Attendance Management Module allows teachers to mark attendance for students on a daily basis, ensuring accurate tracking of student presence. Admins can monitor and review attendance records for both students and teachers. Attendance reports can be generated for different time periods such as daily, weekly, or monthly. Students can access and view their own attendance status, allowing them to keep track of their participation and progress.

3.3.3 Class Management Module

This combined module focuses on managing the school timetable and study materials. Admins can create and update the school timetable, assigning appropriate periods and classes to each teacher. Teachers can view their assigned timetable to ensure they are aware of their schedule. Students can access their class timetable to prepare for upcoming lessons. In addition, teachers can upload study materials and resources for their respective classes, making learning materials readily available to students. Students can easily access, download, and use these study resources to enhance their learning experience.

3.3.4 Exam Management Module

This module manages all aspects related to exams, from scheduling to results. Teachers can schedule exams for their respective subjects, specifying the date and time. Admins review and approve these exam schedules to ensure there are no conflicts or errors. Students

can access and view their exam timetable to prepare in advance. After the exams, teachers upload the exam results, and students can check their results promptly. This system streamlines the process of exam scheduling, result publishing, and student notification.

3.3.5 Assignment Homework Module

The Assignment Homework Module allows teachers to upload assignments and homework tasks for students. Students can view, download, and complete these tasks from the platform. Once completed, students can submit their homework for evaluation. Teachers can then review submitted homework, provide feedback, and assign grades, ensuring timely assessment of students' work. This module enhances student engagement and promotes continuous learning outside of regular class hours.

3.4 Feasibility Study

The feasibility study for the proposed School Management System also focuses on the technical infrastructure that will support the system. The system will be designed as a web-based platform, which ensures it is accessible from any location with an internet connection. The use of modern frameworks and technologies will enable the platform to function efficiently across devices like desktops, laptops, tablets, and smartphones. The back-end infrastructure will rely on robust database management systems such as MySQL or PostgreSQL, which will store student, teacher, and admin data securely and enable quick data retrieval. Cloud-based solutions or on-premise servers will be considered for hosting, depending on the scale of the school's needs and resources.

3.4.1 Operational Feasibility

Operational feasibility is another key area of focus. The proposed system aims to streamline school operations by automating routine tasks, such as attendance recording, exam scheduling, and grade management. This will free up time for administrators and teachers to focus more on academic and student development. However, the successful implementation of the system will require a period of transition, during which staff and

students will be trained on how to use the new system. While the system is expected to be user-friendly, some level of training will be essential to ensure smooth adoption. Ongoing technical support and documentation will also be provided to assist users during the implementation phase and beyond

3.4.2 Technical Feasibility

The technical feasibility of the proposed School Management System focuses on the technological infrastructure and tools required to develop, implement, and maintain the system. The system will be built as a web-based application to ensure accessibility from various devices like desktops, laptops, and mobile devices. The front-end will use modern web technologies such as HTML5, CSS3, and JavaScript, while the back-end will be powered by robust frameworks like Django or Node.js. With proper implementation of security measures such as data encryption, secure login protocols, and user role-based access control, the system will protect sensitive data and maintain privacy. Additionally, the system will support multi-user access, allowing admins, teachers, and students to perform their respective tasks seamlessly. Given the availability of modern development tools, skilled developers, and reliable infrastructure, the technical feasibility of the system is high, ensuring a successful implementation with minimal technical challenges.

3.4.3 Economic Feasibility

The cost of developing the Smart Community Engagement Platform includes initial app development, deployment for Android and iOS, and ongoing maintenance. While these expenses require investment, they can be offset by the platform's ability to streamline operations, reduce administrative effort, and enhance resident engagement. Features such as digital payment processing, local business hubs, and automated service requests can lead to cost savings and potential revenue generation. By improving operational efficiency and fostering community collaboration, the platform demonstrates significant economic feasibility.

3.5 System Environment

The successful implementation of the "EduNest School management system" requires the deployment of specific tools and resources. Below is an overview of the essential requirements for this platform.

3.5.1 Developer Requirement

Hardware Requirement

- **Processor:** Intel Core i3 and above
- **Ram:** 8GB or Above
- **Storage:** 512GB SSD

Software Requirement

- **Operating System:** Windows 11
- **Programming Languages:**
 - **Frontend:** HTML,CSS,Javascript
 - **Backend:** NodeJS, ExpressJS
 - **Database:** MongoDB
- **Integrated Development Environment (IDE):** VS code

3.5.2 User Requirement

- Smartphone, Laptop, Computer
- Stable Internet Access

3.6 Actors and their Roles

3.6.1 Admin

- Manage Users
- Schedule Exams
- Manage attendance
- View time table

3.6.2 Teacher

- Schedule exams
- Manage attendance
- View time table
- Upload study material
- Provide feedback
- Upload exam results
- Upload assignments

3.6.3 Student

- View timetable
- View Exam schedule
- View exam results
- Access study material
- Submit homework
- View assignment

Chapter 4

METHODOLOGY

4.1 Introduction

The Agile methodology is used for this project. Agile software development refers to several methods for creating software in which end users, customers, and self-organizing, cross-functional teams work together to produce requirements and solutions. It promotes flexible and quick responses to change, as well as adaptive planning, evolutionary development, early delivery, and continuous improvement. It is a method for project management that involves constant communication and iterative development. These principles and the frameworks for putting them into practice, such as Scrum, Extreme Programming (XP), and the Adaptive Project Framework, are now referred to as "agile" (APF). One thing that separates Agile from other approaches to software development is the focus on the people doing the work and how they work together. Solutions evolve through collaboration between self-organizing cross-functional teams utilizing the appropriate practices for their context.

4.3 User Story

User Story ID No.	As a (type of user)	I want to (perform some goal)	So that I can (achieve some goal)
1	Admin	Login to system	Manage school operation efficiently
2	Teacher/Student/Parent	Login/Register	Access and update responsibilities
3	Admin	Manage user accounts for teachers and students	Keep the system user db accurate and updated
4	Teacher	Update attendance of students	Maintain accurate attendance records
5	Admin	Monitor attendance records of students and teachers	Ensure accountability and support
6	Student/Parent	View attendance updated by teacher	Ensure accurate attendance effectively
7	Teacher	Share study material and resources with students	Provide additional support for their studies
8	Student	Access study material uploaded by teachers	Enhance learning experience
9	Teacher	Upload assignments for students	Give students tasks to improve
10	Student/parents	View assignments given by teacher	Complete task on time for better learning
11	Teacher	Assign and update homework tasks for classes	Help students review and practice lessons

User Story ID No.	As a (type of user)	I want to (perform some goal)	So that I can (achieve some goal)
12	Student/Parent	View and submit home-work assignment	Complete assignment on time for evaluation
13	Admin	Update the school timetable	Ensure it aligns with the school schedule and activities
14	Teacher	View the school timetable	Plan classes and activities effectively
15	Student/Parent	View class timetable	Stay informed about daily schedules
16	Admin	Monitor and generate attendance report	Analyze student and teacher punctuality and presence
17	Admin	Upload and manage school wide announcements	Communicate important events and activities to everyone
18	Admin	Send notification to teachers and student	Keep stakeholders informed about school updates and announcements
19	Teacher	Schedule exams for subjects	Plan assessments for evaluating students

User Story ID No.	As a (type of user)	I want to (perform some goal)	So that I can (achieve some goal)
20	Admin	Monitor and review exam schedules	Ensure exams are scheduled without conflicts
21	Student/Parent	View the exam schedule	Prepare for upcoming assessments
22	Teacher	Enter and update exam results	Record student performance accurately
23	Student/Parent	View exam results	Understand performance and areas for improvement
24	Admin	Generate performance reports for students	Provide data insights for decision making and interventions

17	Upload and manage school wide announcements	24/02/2025	27/02/2025	2
18	Send notification to teachers and students	24/02/2025	27/02/2025	2
19	Schedule exams for subjects	28/02/2025	02/03/2025	2
20	Monitor and review exam schedule	03/03/2025	07/03/2025	4
21	View the exam schedule	11/03/2025	13/03/2025	2
22	Enter and update exam result	14/03/2025	16/03/2025	2
23	View exam result	17/03/2025	18/03/2025	1
24	Generate performance report for students	18/03/2025	19/03/2025	1

4.6 Design Phase

Figure 4.4: Schema diagram for EduNest School management system

4.7 User Interface Design

4.7.1 Admin Login page

The Admin Login Page of EduNest provides a secure and user-friendly interface for school administrators to access the system. It ensures that only authorized personnel can manage school operations.

The image shows a web form titled "Admin Login" centered on a light gray background. The form has a white background and a subtle drop shadow. At the top, the title "Admin Login" is in bold, followed by the instruction "Enter your credentials to access the dashboard." Below this, there are two input fields: "Username" with the placeholder text "Enter username" and "Password" with the placeholder text "Enter password". Under the password field, there is a checkbox labeled "Remember me" and a blue link "Forgot Password?". At the bottom of the form is a blue button with the text "Login" in white.

Figure 4.5: Admin Login

4.7.2 Admin home

The Admin Home Page serves as the central dashboard for managing all school operations efficiently.

Figure 4.6: Admin home

4.7.3 Manage teachers

Add, update, and oversee teacher records, assignments, and performance from a centralized dashboard.

Figure 4.7: Manage teachers

4.7.4 Manage students

Add, update, and oversee student records efficiently from one central dashboard.

Figure 4.8: Manage student

4.7.5 Schedule exam page

Easily create and manage exam schedules, assign subjects, and set deadlines to ensure a smooth examination process. Plan and organize exams efficiently by setting dates, subjects, and formats, ensuring clarity for students and teachers.

Figure 4.9: Schedule exam

4.7.6 Manage attendance

Manage Attendance page allows administrators to efficiently track and maintain attendance records for both teachers and students. With an intuitive interface, admins can mark attendance, view daily reports, and generate summaries to monitor attendance trends.

Figure 4.10: Manage attendance

4.7.7 View timetable

The View Timetable page provides administrators with a comprehensive overview of the school's class schedules, ensuring efficient management of academic activities. Admins can easily access and review the timetable for different classes, subjects, and teachers, ensuring smooth coordination of lessons.

The screenshot displays the 'Weekly Timetable' page in the EduNest system. The page has a blue header with the 'EduNest' logo and navigation links: 'Home', 'Manage Teacher', 'Manage Student', and 'Logout'. Below the header, the title 'Weekly Timetable' is centered, followed by the subtitle 'Check class schedules and timings.' The main content area shows two sections for 'Monday' and 'Tuesday'. Each section contains a table with five columns: 'Time', 'Subject', 'Teacher', 'Class', and 'Actions'. The 'Actions' column for each row contains an 'Edit' button.

				Edit

Figure 4.11: View time table

4.7.8 Teacher login page

The Teacher Login Page allows educators to securely access their accounts within the EduNest system. Teachers can enter their registered email and password to log in and manage their classes, assignments, and attendance records.

The screenshot displays the 'Teacher Login' interface. At the top, a blue header bar contains the 'EduNest' logo. Below this, a white login card is centered on a light gray background. The card features the title 'Teacher Login' and a subtitle 'Enter your credentials to access your account.' It includes two input fields: 'Email' with the placeholder 'Enter your email' and 'Password' with the placeholder 'Enter your password'. A blue 'Login' button is positioned below the password field, and a blue link for 'Forgot Password?' is located at the bottom of the card.

Figure 4.12: Teacher login

4.7.9 Teacher home page

The Teacher Dashboard helps teachers manage their classes and students easily. They can schedule exams, track attendance, upload study materials, and give feedback. Teachers can also upload exam results, post assignments, and view timetables. EduNest makes teaching simple and organized.

Figure 4.13: Teacher home

4.7.10 Upload study material

The "Upload Study Materials" page allows teachers to upload, manage, and share study materials with students. It provides an intuitive interface where teachers can add study materials, describe them, and upload related files such as PDFs, Word documents, or presentations.
